Exactly what are Cookies?

Cookies are a feature of web browser (Internet Explorer, Netscape Navigator, etc.) software that allow web servers to recognize the computer used to access a site. They are small pieces of data that are stored by a user's web browser on one site to simplify subsequent interactions with that site by the same user or to use the information to streamline the user's transaction on related web pages. This makes it easier for a user to move from site to site and to complete transactions over the Internet. Cookies should make your online experience easier and more personalized.
